

COMPLIANCE

Regulatory Compliance: Regs4ships

One-stop regulatory
compliance

A trusted source for regulatory publications

Through OneOcean Compliance, leaders and decision-makers aboard and onshore can access up-to-date official regulatory documents needed to ensure compliance with global requirements, wherever they are.

Regs4ships, LR OneOcean's Regulatory Compliance module, provides uninterrupted access to live and archived regulatory publications – covering not just IMO content but multiple sources, including the ILO and numerous flag states. Fully digital, it is a centralised solution for accessing regulatory information, ensuring that crews and shoreside teams have the most up-to-date compliance data at their fingertips, even when offline.

Search our unrivalled collection of maritime legislation, regulations and documents in one digital tool.

The image displays two overlapping screenshots of the Regs4Ships web application. The top screenshot shows the main dashboard with a navigation menu on the left and several content panels. The 'International' section is active, showing 'Popular Links' (SOLAS, MARPOL, STCW, etc.), 'International Indexes' (IMO, ILO, WHO, etc.), and 'Latest Updates' with a list of recent regulatory changes and their dates. The bottom screenshot shows a detailed view of a 'Merchant Marine Circular' (MMC-245) from the Panama Maritime Authority, including its title, subject, references, and key points regarding authorized private maritime security companies (PMSC) transiting high-risk areas.

Mitigate the risk

Staying compliant can be a complex and time-consuming process for seafarers. You need to factor in international laws, ever-changing maritime regulations, plus marine rules that protect crew, cargo, vessels, and the environment. And the repercussions for getting it wrong can be significant, incurring both financial and reputational consequences.

Regs4ships replaces the manual process of sourcing, researching, collecting, reviewing, updating, distributing, and tracking regulations on a vessel-by-vessel basis – so that you can focus on implementing operational changes.

Its regulatory databases are updated and managed by the LR OneOcean team of professional mariners, giving you the most quality data and an extensive archive built over 20+ years.

Benefits

Mitigated risk of non-compliance through uninterrupted access to regulations.

Provides clarity around regulation changes and updates, helping you understand the impact on internal processes and policies.

Saves time, removing manual searches across multiple publications.

Conserves valuable hard drive space on board as there is no need to store the entire Regs4ships database offline.

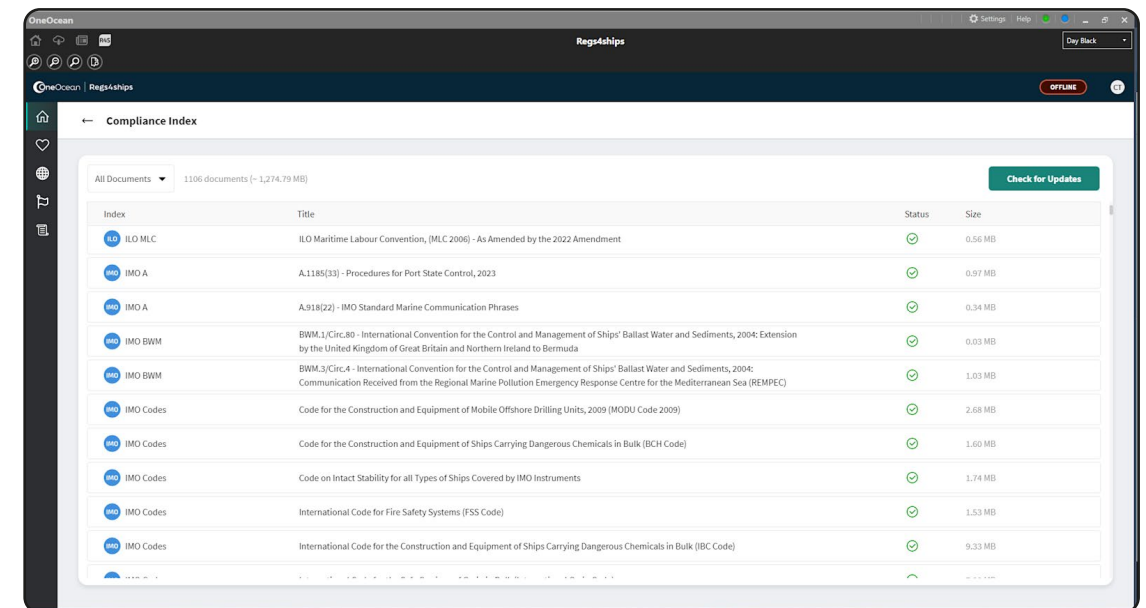

Features

Online and full offline operating modes for crew onboard, including a **secure, encrypted and stable backup** for mandatory documents.

Document Histories signify that documents are up to date.

Advanced searchability with a customisable view, including favourites, saved searches and the latest updates by source.

Secure, encrypted and stable backup (Compliance Index) pre-defines the essential documents required for compliance on board in line with carriage requirements.

Mitigate the risk

The innovative solution can be used on PCs and tablets. With the Onboard version (via the OneOcean Platform) allowing crew to seamlessly switch between online and full offline operating modes - enabling uninterrupted access to regulations.

Our secure, encrypted and stable backup for mandatory documents when connectivity is limited, known as the Compliance Index, ensures crew always maintain compliance. By hosting documents on our own servers, we remove any further risk of losing access to publications.

Additionally, by integrating Regs4ships Onboard with the OneOcean Platform, users can reference regulatory requirements alongside key voyage variables. Delivering a comprehensive, big-picture perspective for planning routes and operations with confidence.

Benefits

Supports advanced planning to ensure operations and procedures remain compliant, with unified experiences for ship and shore.

View the full picture with related documents and contextualise the wider regulatory landscape.

Demonstrates compliance to authorities, regulators, and insurers.

Save valuable onboard bandwidth for other critical operations, minimising unnecessary data consumption.

Features

New amendments to regulations are processed and live **within 48 hours** of being made available by the source, and a **12-month timeline** of forthcoming amendments.

Includes **regulations for flag states** with White List status and others under the Paris MoU PSC regime. **Additional datasets**, such as LR Rules, are also available online and offline.

The **Compliance Index** provides a dedicated view of documents for inspection purposes whilst **Document Histories** and **Latest Updates** demonstrate you are up to date, and therefore compliant. Regs4ships is also **endorsed by flag states and authorities** as a compliant solution.

Shoreside configurability enables personnel to manage whether vessels can browse Regs4ships online.
