# Regs4ships

The industry-leading digital regulations tool making it quick and easy to stay up to date and comply with maritime regulations.

R4S

The only solution to today's highly complex regulatory environment. A fully digital toolset combining flag state compliance documentation with regulations ensures every location and vessel has intelligent access to the latest rules and regulations. IMO, ILO and MARPOL legislation are all covered.

Regs4ships removes uncertainty by highlighting upcoming changes and automating document control amongst

the fleet. It replaces the manual process of collecting, reviewing, updating, distributing and tracking maritime regulation changes – on a vessel-by-vessel basis.

Join over 6,000 vessels using Regs4ships to ensure compliance is not only met but delivered with ease at all times, whilst also protecting the environment.

## The challenges

Keeping up to date with multiple, ever-changing regulations is a complex and time-consuming task. It is a necessity to remain compliant.

There are challenges in collecting data from multiple sources, interpreting how it impacts the vessel, and ongoing management to stay abreast of updates and changes. This includes manually searching for updates across a variety of sources, some of which are not easily obtained or accurately interpreted, leading to human error and questions raised over its accuracy.

## One central solution

Regs4ships provides the latest publications and regulatory updates in one powerful digital solution. Maintained by OneOcean's team of professional mariners, Regs4ships is continuously updated with the latest Flag State and international regulations such as IMO, ILO and MARPOL. All updates and amendments are in real-time, eradicating compliance risk and the need to carry out manual searches.

### What it enables?

#### Mitigate risk

Reduce the risk by having the latest information and regulations in one place.

#### Time-saving

Avoid time-consuming manual searching and updating.

#### Demonstrate compliance

Make it easy to demonstrate to authorities, regulators and insurers that you are up to date.

#### Forward planning

Enable forward planning with forthcoming amendments awareness.

### How it works?

#### Automatic updates

Automatically displays active and live information.

#### Searchable data

Powerful search and subject index engine.

#### Future-proof

Be aware of forthcoming amendments.

#### Regulatory library

Full library of archived regulations within easy reach.
