

# LogCentral

The leading solution for accurate onboard record-keeping.

LogCentral is OneOcean's digital solution allowing crews to maintain MARPOL record books with accuracy and ease.

Standardising record book entries and having them completed in a consistent digital format removes the risk of accidental omissions and errors.

LogCentral is the modern means for delivering this consistency, allowing you to confidently manage and easily access record books. The solution's record

book fields are all pre-set, so you know exactly what information is required and no longer have to worry about overlooking critical details.

With LogCentral, crews spend less time determining the correct way to enter data. Each digital record book is pre-coded, and entries are time-stamped and easily traceable for added security. Each user has a pin and password, so a name gets assigned to every entry submitted.

## Capture valuable data

Record books are an essential but time-consuming part of working aboard a modern maritime vessel. Filling them in regularly and accurately can be time consuming and burdensome for crews. Omissions in information and delays in time taken to produce records to authorities can lead to penalties and, in some cases, can impact the basic operation of a vessel.

The data in record books is often held onboard for years and sharing them with shoreside teams can be difficult. Paper record books and even disparately handled digital ones cannot be easily analysed or understood, depriving companies of the opportunity to use record book data to properly understand fleet activity and build in efficiencies.

## Delivering real value

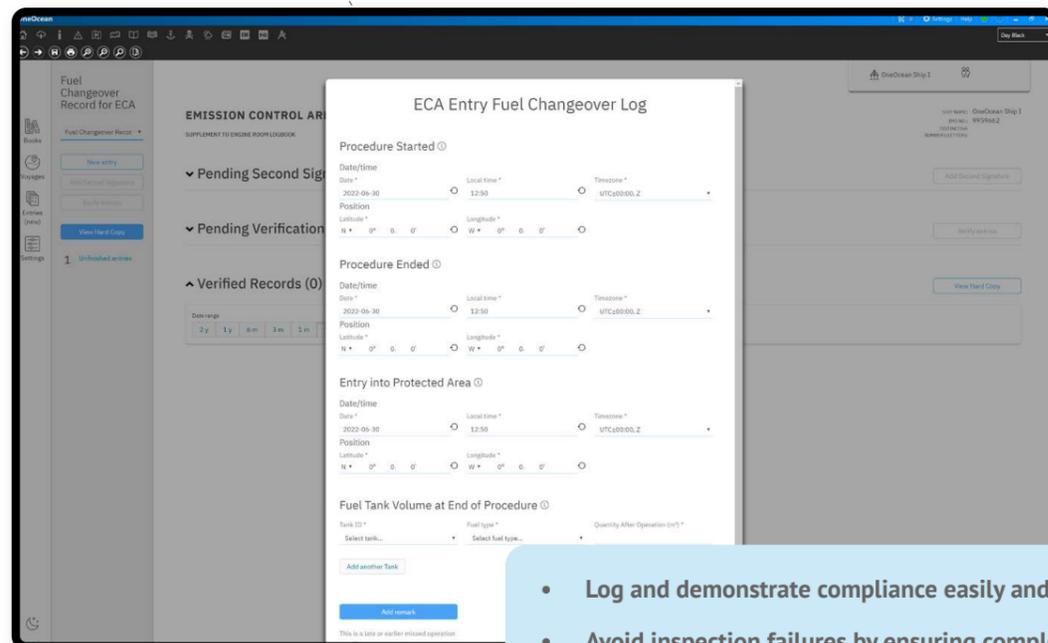

Onboard paper record books each come in different formats and are required to store information on various aspects of a ship's operations. Keeping them up to date takes considerable time, and omissions, illegible entries and false submissions can too easily occur.

Saving valuable time for your crews is important; having your records completed consistently and accurately is essential. Storing that data and having it readily available for analysis can be an integral part of your company's forward planning. LogCentral answers all these needs and delivers real value to your operations.

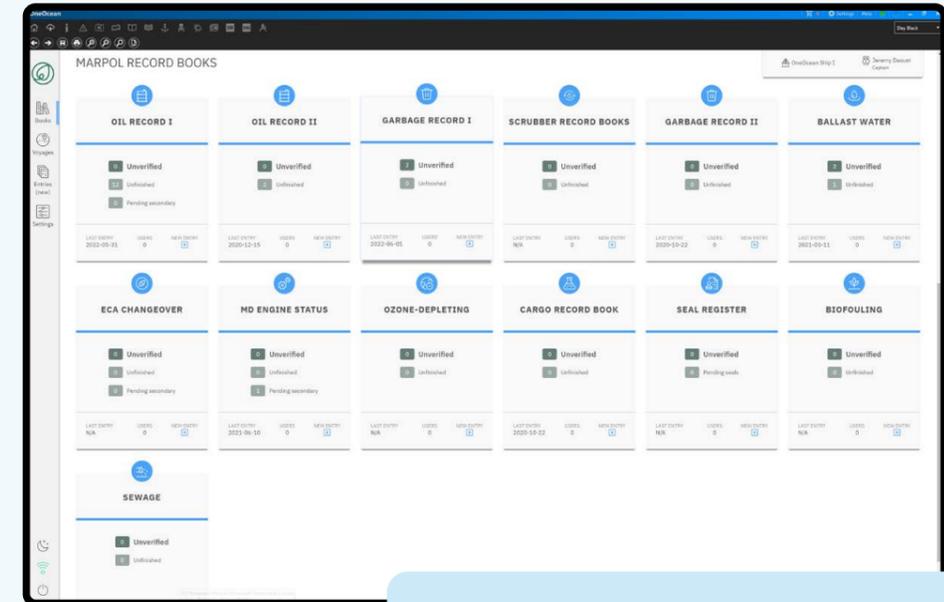

## A smarter solution

Digitisation has made completing paper record books no longer necessary. There is a better, faster, more accurate and easier way to access and manage your fleet's record keeping. That solution is LogCentral.

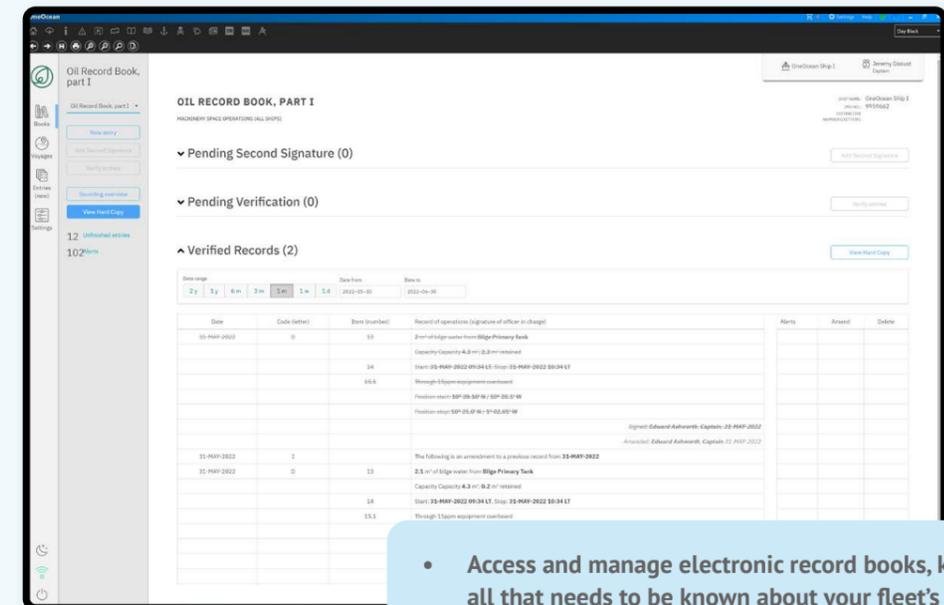

Shoreside teams gain access to fleet-wide entries, allowing them to easily monitor activities, follow trends and submit records to the regulatory authorities. It's simply a smarter solution.

- Log and demonstrate compliance easily and quickly
- Avoid inspection failures by ensuring complete and accurate record keeping

- View all the required record books for MARPOL compliance, along with their current status
- Monitor and analyse operational activities so that benchmarks can be set

- Access and manage electronic record books, knowing all that needs to be known about your fleet's operations
- Remotely audit any record book at any time
- Make efficiency the watchword throughout the fleet

# Better in every way than paper

## Data is synchronised

All record books are presented in the same format across all workstations and onshore. This makes it easier for the information to be reviewed and signed off.

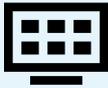

## Entries can be verified

They can also be traced based on the user's credentials. This makes it easy to identify who submitted each entry for audit and accountability purposes.

## Pre-formatted

This provides a uniform way to enter data into pre-determined fields. Errors and omissions are far less likely to occur.

## An easy interface

Anyone can use LogCentral's easy and intuitive interface.

## Monthly reports

Each user has a unique username, password and pin. All data is time stamped, and can be reviewed, as well as approved through the solution.

Contact us today to see how LogCentral can deliver greater efficiency and peace of mind. Don't hesitate to request a demo or to talk about the complete suite of OneOcean solutions.
