Technical Ship Management:

Docmap

The maritime industry's digital
solution for safety management.

Navigating **maritime** **safety** with **confidence**

In the maritime industry, safety and compliance are paramount. Vessels and shoreside teams face extensive documentation, reporting, inspection, and risk management tasks that can be both time-consuming and complex.

Without a centralised system, ensuring all safety protocols, documents, and records are up-to-date becomes a significant challenge, impacting both operations and crew well-being. A robust safety management system, however, not only supports safer operations but also demonstrates to external stakeholders that the highest safety standards are continuously upheld and improved.

Introducing Docmap

Docmap by OneOcean is a comprehensive digital solution that consolidates safety management, streamlining the vast array of quality, health, safety, and environmental (QHSE) requirements.

Designed specifically for maritime operations, Docmap enables teams to always stay in control of compliance, reducing the administrative burden and providing clear oversight. From document management to risk assessments, Docmap simplifies compliance processes, reduces risks, and enhances oversight to meet the demands of modern maritime operations.

Docmap for safety & compliance

1

Streamline compliance

Docmap centralises and organises operational documentation, supporting ISM, ISPS, MLC, ISO 9001, ISO 14001, and more. This makes critical information easily accessible and simplifies audit preparation.

2

Enhance visibility and foster collaboration

By consolidating QHSE data, Docmap enables both shoreside and onboard teams to access the latest safety protocols and records. Near real-time synchronisation keeps information consistent across office and fleet, improving oversight and control.

3

Boost operational efficiency

The platform reduces time spent on administrative and compliance tasks, allowing crew and management to focus on core tasks and reduce manual workload.

4

Reduce risk

Docmap's centralised document management and structured workflows help mitigate risks by ensuring all safety-related information is complete, accurate, and verified by relevant team members. This reduces the likelihood of human error and helps prevent safety incidents.

5

Integrate seamlessly

Docmap's compatibility with third-party systems, such as HR, analytics platforms, and classification societies, supports a unified safety management environment, enhancing both workflow efficiency and data accuracy.

Solutions to **elevate maritime safety**

Documents

Centralises a wide range of essential documents—from policies and certificates to operational records—ensuring they are accessible, current, and audit-ready. With version control, approval workflows, and flexible access settings, Docmap streamlines compliance, enhances collaboration, and mitigates risks by supporting accurate, verified documentation across teams.

E-Forms

Enables easy creation and sharing of custom forms for onboard and onshore use, supporting consistent, efficient data entry across teams. With the webform builder, users can design forms tailored to specific needs, streamlining record-keeping and ensuring accurate data collection.

Incidents & Actions

Simplifies incident reporting, corrective and preventive actions, and root cause analysis through custom workflows. By providing a single source for tracking and managing incidents, Docmap helps teams improve safety standards and maintain a comprehensive record of compliance activities.

Risk Assessments

Provides tools to plan, conduct and analyse risk assessments, helping crews plan and mitigate hazards effectively. This module supports safer operations by streamlining risk management tasks and ensuring all assessments are accessible and complete.

Analytics

Offers data insights through intuitive reporting, allowing teams to monitor safety performance and identify improvement areas. With integration options for third-party solutions like Microsoft Power BI, Docmap enhances decision-making with data-driven support.

Brought to you
by **OneOcean**

Committed to maritime excellence

As a leader in maritime digital solutions, OneOcean combines cutting-edge technology with decades of industry expertise. Our solutions empower maritime professionals to navigate complex regulatory landscapes confidently, enhance operational efficiency, and uphold the highest safety standards. With OneOcean, you gain a trusted partner committed to advancing safe, sustainable, and compliant maritime operations worldwide.
