Governance, Risk & Compliance:

MarineRegulations

Stay audit ready, wherever you are

Take the complexity out of compliance

The global regulatory landscape has never been more complex. Stricter safety standards, expanding environmental demands and shifting regional rules are arriving at pace. For ship managers and operators, this means more to monitor and a growing risk of non-compliance, delays, detentions, fines and reputational damage.

The challenge is that compliance is rarely straightforward. Requirements differ depending on flag, class, trading area, vessel type, cargo, and even the next port of call. A change in destination or route can affect the regulations a vessel needs to adhere to, along with the documents that must be carried on board to be inspection-ready.

For shoreside teams responsible for compliance, ensuring every vessel carries accurate, up-to-date regulations is an ongoing challenge. It means tracking changes across multiple regulatory bodies, identifying which updates affect which vessels, revising the relevant documentation, and distributing the correct version to every ship in the fleet.

Getting those documents on board, whether physical or digital, presents its own set of hurdles. Shipping hard copies is costly and logistically complex, while limited or unreliable connectivity at sea means online-only solutions are not always effective. Any delay or gap in delivery can leave crews without the documentation they need when it matters most.

When documentation is missing or out of date, the cost of non-compliance can be immediate and far-reaching. Delays, detentions, legal action and reputational damage can all hit the bottom line, and the cost of a single incident can far outweigh the effort needed to stay on track.

You need a smarter, simpler way to keep every vessel audit-ready, all of the time.

Audit Ready. Always. Everywhere.

MarineRegulations takes the effort and uncertainty out of compliance by giving your fleet instant, reliable access to over 80,000 regulatory documents – always kept up to date.

Developed and maintained by a dedicated team of maritime experts, MarineRegulations provides access to the latest regulatory content from the IMO, flag states, classification societies, and other key authorities – all in one trusted source.

New or updated regulations are identified, reviewed and added to the digital library by experts. The solution then automatically distributes the relevant documents to each vessel or user, based on their flag, class, equipment and trading area. There is no more wasted time tracking updates or wondering if the right version is on board.

Tailored to your vessels

Vessel-specific libraries ensure that each vessel receives only the regulations relevant to their specific type, equipment, and operations. This reduces confusion and data use, while helping crews focus on what matters.

Accessible anywhere

MarineRegulations works seamlessly at sea or ashore, whether accessed in a browser or via the dedicated app. Offline access and low-bandwidth updates mean your teams have the right information when and where they need it, without manual intervention or complex installation.

Simplify compliance.

Protect your operations.

MarineRegulations transforms the way maritime regulations are managed, distributed and accessed.

By removing the burden of manually tracking and distributing changes to regulations in-house, it gives your teams the clarity, speed and confidence they need to stay inspection-ready at all times.

Keep your vessels and fleet compliant with proactive alerts, a live directory of upcoming changes, and automatic updates delivered directly to vessel libraries. With access to an extensive and always up-to-date collection of maritime regulations and documents – tailored to each vessel – you can reduce risk, avoid costly delays, and protect your reputation. Whether at sea or ashore, your teams have exactly what they need, when they need it – without the administrative hassle.

Benefits

- Reduce risk** of costly delays and detentions
- Protect your reputation** by eliminating compliance gaps
- Save time** and cut administrative workload
- Keep crews informed** with up-to-date information
- Stay inspection-ready** at sea and ashore

Features

- Over 80,000 maritime regulatory documents** instantly accessible
- Automatic updates** tailored to each vessel's needs
- Offline access** for always-on availability
- Proactive alerts** for new and updated regulations
- With the dedicated mobile app**, you can use MarineRegulations anywhere
