Governance, Risk & Compliance:

Regs4ships

One-stop regulatory compliance

A trusted source for regulatory publications

Through **Regs4ships**, leaders and decision-makers aboard and onshore can access up-to-date official regulatory documents needed to ensure compliance with global requirements, wherever they are.

Regs4ships provides uninterrupted access to live and archived regulatory publications – covering not just IMO content but multiple sources, including the ILO and numerous flag states. Fully digital, it is a centralised solution for accessing regulatory information, ensuring that crews and shoreside teams have the most up-to-date compliance data at their fingertips, even when offline.

The screenshot shows the 'International' section of theRegs4ships platform. On the left, a sidebar lists 'Popular Links' including SOLAS, MARPOL, STCW, IMO Conventions, Codes, and IMO Anti-Piracy. The main content area is divided into 'International Indexes' (IMO, EU Legislation, Anti-Piracy, Instructions to Surveyors) and 'Latest Updates' (a list of recent documents from various international organizations like ILO, WHO, and MCA). Below these are sections for 'IMO Forthcoming Amendments' and 'IMO Chapter 2-2 Regulation 15'.

The screenshot shows a specific document titled 'MMC-245 - Authorized Private Maritime Security Companies (PMSC) Transiting High-Risk Areas (Online Application) (Rev. 01/22)'. The document is a PDF and can be viewed in full screen. It is titled 'Merchant Marine Circular' and is from the Panama Maritime Authority. The document details the requirements for PMSCs transiting high-risk areas, including the use of Armed Security Personnel (ASPs) and Armed Protection Detachments (APDs). It also includes a table of contents and several annexes.

Search our unrivalled collection of maritime legislation, regulations and documents in one digital tool.

Mitigate the risk

Staying compliant can be a complex and time-consuming process for seafarers. You need to factor in international laws, ever-changing maritime regulations, plus marine rules that protect crew, cargo, vessels, and the environment.

And the repercussions for getting it wrong can be significant, incurring both financial and reputational consequences. Regs4ships replaces the manual process of sourcing, researching, collecting, reviewing, updating, distributing, and tracking regulations on a vessel-by-vessel basis

– so that you can focus on implementing operational changes. Its regulatory databases are updated and managed by the OneOcean team of professional mariners, giving you the most quality data and an extensive archive built over 20+ years.

Benefits

Mitigate risk of non-compliance through uninterrupted access to regulations.

Gain clarity around regulation changes and updates, helping you understand the impact on internal processes and policies.

Save time, removing manual searches across multiple publications.

Conserve valuable hard drive space on board as there is no need to store the entire Regs4ships database offline.

Features

Online and full offline operating modes for crew on board, including a secure, encrypted and stable backup (Compliance Index) for mandatory documents.

Document Histories signify that **documents are up to date**.

Advanced searchability with a customisable view, including favourites, saved searches and the latest updates by source.

Secure, encrypted and stable backup (Compliance Index) pre-defines the essential documents required for compliance on board in line with carriage requirements.

Mitigate the risk

The innovative solution can be used on PCs and tablets. With the Onboard version allowing crew to seamlessly switch between online and full offline operating modes - enabling uninterrupted access to regulations.

Our secure, encrypted and stable backup for mandatory documents when connectivity is limited, known as the Compliance Index, ensures crew always maintain compliance. By hosting documents on our own servers, we remove any further risk of losing access to publications.

Additionally, by combining Regs4ships Onboard with our PassageManager solution, users can reference regulatory requirements alongside key voyage variables. Delivering a comprehensive, big-picture perspective for planning routes and operations with confidence.

Benefits

Plan ahead to ensure operations and procedures remain compliant, with unified experiences for ship and shore.

View the full picture with related documents and contextualise the wider regulatory landscape.

Save valuable onboard bandwidth for other critical operations, minimising unnecessary data consumption.

Demonstrate compliance to authorities, regulators, and insurers.

Features

New **amendments to regulations** are processed and live **within 48 hours** of being made available by the source, and a **timeline** of forthcoming amendments.

Includes **regulations for flag states** with White List status and others under the Paris MoU PSC regime. **Additional datasets**, such as **LR Rules**, are also available online and offline.

Shoreside configurability through our FleetManager solution enables personnel to manage whether vessels can browse Regs4ships online.

The Compliance Index provides a **dedicated view of documents for inspection purposes** whilst Document Histories and Latest Updates demonstrate **you are up to date, and therefore compliant**. Regs4ships is also **endorsed by flag states and authorities** as a compliant solution.
